NUTRITION FOR CANADIAN HERDS

## SEASONAL TUB SUMMARY

While all of our tubs can be used year-round, here are our top recommended tubs, by season.

|  | 30% Tub                             | Breeder Tub<br>(Mineral) | Maxi Tub | 18% Tub | Breedback Tub |
|--|-------------------------------------|--------------------------|----------|---------|---------------|
| <b>Winter</b><br>The herd needs more protein, MOS and Vitamin E.                     | ✓<br><i>(Feed with corn stover)</i> | ✓                        | ✓        |         |               |
| <b>Spring</b><br>The herd needs more MOS, Vitamins A+E and Calcium/Phosphorus.       |                                     | ✓                        | ✓        | ✓       |               |
| <b>Summer</b><br>The herd needs more Energy Sources, Protein, Vitamins A+E, and MOS. |                                     | ✓                        | ✓        | ✓       |               |
| <b>Fall</b><br>The herd needs more MOS, Chelates, Energy and Vitamins A+E.           |                                     | ✓                        | ✓        |         | ✓             |
